

Conditioner

Description

Conditioner is a maintenance product which is specially developed for cleaning and maintenance of surfaces treated with Nanocoat.

Purpose

Conditioner is intended for the weekly and / or monthly maintenance of all treated with Nanocoat surfaces. This conditioner is suitable for the maintenance and cleaning of your treated surfaces.

Benefits

- - Protects against aging, yellowing and chalking
- - Dirt no longer adheres to the surface and can be removed easily with water
- - Easy application
- - Extends the life of the base coating

Applications

- Plastics
- Stainless steel
- Chrome
- Steel
- Glass
- Powder coated or painted elements

Main features

- Product is silicone free
- The applied nano layer provides extended protection against pollution

Colour and Shine

- Pink
- Dries colourless and streak-free (no cover)
- Invisible

Packing

- Bottle of 1 litre
- Jerry cans of 5 litres and 10 litres.

Consumption

20-25ml per 5 litres of water*

*This indicated consumption is a reference value. Depending on the nature of the surface and the processing it may vary. Exact values can only be determined per project through plots.
